

# NEW!

Occupational Health and Safety Program. The OHS Plan system has been discontinued. From now on, all personnel must enroll themselves in the new **web-based** Animal Care and Use Occupational Health and Safety Program. To enroll in the program, each protocol participant must visit the web site, <http://www.research.uiuc.edu/OHS>, and click Enroll Now (menu on left side). You will be directed to log in and complete the Animal Care and Use Risk Assessment form. Once this simple form is submitted, you are enrolled in the program. All newly added personnel must be enrolled prior to participating in animal use.

The final question in the OHS enrollment form asks you to opt in or out of the confidential Health Screening for Animal Users. Completion of the questionnaire, though not compulsory, is strongly encouraged to better assess your personal risks based on animal exposure and health history.
